

Mary Baker Eddy says in *Science and Health with Key to the Scriptures*, “Prayer, watching, and working, combined with self-immolation, are God's gracious means for accomplishing whatever has been successfully done for the Christianization and health of mankind.” Mrs. Eddy knew Christian Science treatment, scientific prayer, to be powerful, effective, immediate, and demonstrable; prayer that gets results, prayer that heals.

Pure In Heart holds these “PrayerMeetings” for the purpose of reaching out to the community and the world with this effective powerful prayer, bringing the Christ truth to bear upon receptive hearts and minds everywhere. It is our consecrated hope that this time together in silent prayer will uplift individual and world thought to the spiritual view that heals. It is also our trust that this example of devotion to individual silent prayer will gently point us all to the importance of turning quickly to scientific prayer as taught in Christian Science, actively utilizing it, daily exercising it, patiently practicing it, and confidently employing it until we can heal consistently with it.

Let us keep our prayer today absolute, diving down into the relative only to declare its nothingness; returning quickly to the mountain top of pure absolute spiritual truth. If you are new to Christian Science treatment or the specifics of scientific prayer as taught in Christian Science, we highly recommend looking into Primary Class instruction from an authorized Teacher of Christian Science.

Mrs. Eddy says further, “Prayer cannot change the Science of being, but it tends to bring us into harmony with it.” We are here today to demonstrate this harmony, to bring it to bear upon the world. Our prayers today are a step toward attaining this spiritual vista, this Christ view, the promise of, “as in heaven, so on earth, - God is omnipotent, supreme.”
